CONTENTS.

PAPERS COMMUNICATED TO THE CHEMICAL SOCIETY.

PAGE

Rammelsberg Memorial Lecture. By H. A. MIERS, M.A., D.Sc., F.R.S., Waynflete Professor of Mineralogy in the University of Oxford 1

I.—2 : 3 : 5-Trichlorobenzoic Acid. By FRANCIS EDWARD MATTHEWS 43

II.—The Nitration of Benzeneazosalicylic Acid. By JOHN THEODORE HEWITT and J. J. FOX. 49

III.—Oxidation of Benzalthiosemicarbazone. By GEORGE YOUNG, Ph.D., and WILLIAM EYRE, B.Sc. 54

IV.—A Simplified Method for the Spectrographic Analysis of Minerals. By WALTER NOEL HARTLEY, F.R.S., and HUGH RAMAGE, F.I.C., A.R.C.Sc.I. 61

V.—The Alkaloid of *Hyoscyamus muticus* and of *Datura Stramonium* grown in Egypt. By WYNDHAM R. DUNSTAN, F.R.S., and HAROLD BROWN, Assistant Chemist in the Scientific Department of the Imperial Institute 71

VI.—The Inversion of the Optically Active *ac*-Tetrahydro-*β*-naphthylamines prepared by the aid of *d*- and *l*-Bromocamphorsulphonic Acids. By WILLIAM JACKSON POPE and ALFRED WILLIAM HARVEY 74

VII.—The Alkaloids of *Corydalis cava*. Conversion of Corybulbine into Corydaline. By JAMES J. DOBBIE, D.Sc., M.A., ALEXANDER LAUDER, B.Sc., and PHOTIOS G. PALIATSEAS . 87

VIII.—Relationships of Oxalacetic Acid. By HENRY J. HORSTMAN FENTON, F.R.S., and HUMPHREY OWEN JONES, B.A., B.Sc. 91

IX.—Interaction of Urethanes and Primary Benzenoid Amines. By AUGUSTUS EDWARD DIXON, M.D. 102

X.—Infracampholenic Acid, an Isomeride of Campholytic and *iso*Lauronolic Acids. By MARTIN ONSLOW FORSTER . . 108

XI.—Tutu. Part I. Tutin and Coriamyrtin. By THOMAS HILL EASTERFIELD, Professor of Chemistry, Victoria College, Wellington, N.Z., and BERNARD CRACROFT ASTON, Chemist to the New Zealand Department of Agriculture . . . 120

13859

PAGE

XII.—Some α-Alkyl Substitution Products of Glutaric, Adipic, and Pimelic Acids. By J. W. Mellor 126

XIII.—Santalenic Acid. By Alfred C. Chapman, F. C. . . . 134

XIV.—The Interaction of Ethyl Sodiomethylmalonate and Mesityl Oxide. By Arthur William Crossley . . . 138

XV.—Ammonium Bromide and the Atomic Weight of Nitrogen. By Alexander Scott 147

XVI.—The Nitration of the Three Tolueneazophenols. By John Theodore Hewitt and James Henry Lindfield . . . 155

XVII.—The Bromination of *o*-Oxyazo-compounds and its bearing on their Constitution. By John Theodore Hewitt and Henry Ablett Phillips 160

XVIII.—The Influence of Solvents on the Rotation of Optically Active Compounds. I. Influence of Water, Methyl Alcohol, Ethyl Alcohol, *n*-Propyl Alcohol, and Glycerol on the Rotation of Ethyl Tartrate. By T. S. Patterson . 167

XIX.—On the Union of Hydrogen and Chlorine. Parts I to III. By J. W. Mellor 216

XX.—On the Nature of Polyiodides and their Dissociation in Aqueous Solution. By Harry Medforth Dawson, Ph.D., B.Sc., late 1851 Exhibitioner 238

XXI.—The Decomposition of Chlorates. Part III. Calcium Chlorate and Silver Chlorate. By William H. Sodeau, B.Sc. 247

XXII.—The Action of Ethylene Dibromide on Xylidine and ψ-Cumidine. By Alfred Senier and William Goodwin . 254

XXIII.—The Action of Phenylcarbimide on Diphenyl-, Dialphyl-, and Dinaphthyl-diamines. By Alfred Senier and William Goodwin 258

XXIV.—Note on the use of Pyridine for Molecular Weight Determinations by the Ebullioscopic Method. By William Ross Innes, M.Sc., Ph.D. 261

XXV.—The Amide, Anilide, and *o*- and *p*-Toluidides of Glyceric Acid. By Percy Faraday Frankland, Frederick Malcolm Wharton, and Henry Aston 266

XXVI.—The Preparation of Acetylchloraminobenzene and some related Compounds. By F. D. Chattaway and K. J. P. Orton 274

XXVII.—The Preparation of Esters from other Esters of the same Acid. By T. S. Patterson and Cyril Dickinson . 280

XXVIII.—Note on Tecomin, a Colouring Matter derived from the Heart-Wood of *Bignonia Tecoma*. By Theophilus H. Lee 284

XXIX.—Iron Nitride. By Gilbert John Fowler, M.Sc. (Vict.) 285

PAGE

XXX.—The Heat of Formation and Constitution of Iron Nitride. By Gilbert John Fowler, M.Sc. (Vict.), and Philip Joseph Hartog, B.Sc. (Lond. and Vict.) . . . 299

XXXI.—The Preparation of Iodic Acid. By Alexander Scott and William Arbuckle 302

XXXII.—The Reaction between Ethyl Alcohol and Hydrochloric Acid. By Thomas Slater Price, D.Sc. (late 1851 Exhibition Scholar) 303

XXXIII.—The Collection and Examination of the Gases produced by Bacteria from certain Media. By Walter Charles Cross Pakes and Walter Henry Jollyman . . 322

XXXIV.—Tetramethylenecarbinol. By W. H. Perkin, jun. . 329

XXXV.—The Action of Aluminium Chloride on Camphoric Anhydride. By F. H. Lees and W. H. Perkin, jun. . 332

XXXVI.—The Action of Hydrogen Bromide on Carbohydrates. By Henry J. Horstman Fenton, F.R.S., and Miss Mildred Gostling, B.Sc. 361

XXXVII.—The Ketonic Constitution of Cellulose. By Charles Frederick Cross and Edward John Bevan. . . . 366

XXXVIII.—Isomeric Hydrindamine Camphor-π-sulphonates. Racemisation of α-Bromocamphor. By Frederic Stanley Kipping, Ph.D., D.Sc., F.R.S. 370

XXXIX.—$\alpha\alpha$-Hydroxycamphorcarboxylic Acid. By Arthur Lapworth and Edgar M. Chapman 377

XL.—The Bacterial Decomposition of Formic Acid into Carbon Dioxide and Hydrogen. By Walter Charles Cross Pakes and Walter Henry Jollyman 386

XLI.—Preparation of Substituted Amides from the Corresponding Sodamides. By Arthur Walsh Titherley, M.Sc., Ph.D. 391

XLII.—A New Method of Preparing Diacetamide. By Arthur Walsh Titherley, M.Sc., Ph.D. 411

XLIII.—Note on Two Molecular compounds of Acetamide. By Arthur Walsh Titherley, M.Sc., Ph.D. 413

XLIV.—A New Method for the Measurement of Ionic Velocities in Aqueous Solution. By B. D. Steele, B.Sc., 1851 Exhibition Scholar (Melbourne) 414

XLV.—Isomeric Salts containing Quinquevalent Nitrogen. Part VII. Benzylhydrindamine Bromocamphorsulphonates. By Frederic Stanley Kipping, Ph.D., D.Sc., F.R.S., and Harold Hall, A.I.C. 430

XLVI.—Isomeric Hydrindamine Mandelates and Phenylchloracethydrindamides. By Frederic Stanley Kipping, Ph.D., D.Sc., F.R.S., and Harold Hall, A.I.C. 442

PAGE

XLVII.—Organic Derivatives of Silicon. Triphenylsilicol and Alkyloxysilicon Chlorides. By F. Stanley Kipping, Ph.D., D.Sc., F.R.S., and Lorenzo L. Lloyd 449

XLVIII.—The Bacterial Oxidation of Formates by Nitrates. By Walter Charles Cross Pakes and Walter Henry Jollyman 459

XLIX.—The Action of Acetylchloro- and Acetylbromo-aminobenzenes on Amines and Phenylhydrazine. By F. D. Chattaway and K. J. P. Orton 461

L.—The Preparation of *o*-Chloroaniline. By F. D. Chattaway and K. J. P. Orton 469

LI.—Condensation of Phenols with Esters of the Acetylene Series. Part IV. Benzo-γ-pyrone and its Homologues. By Siegfried Ruhemann and Harold W. Bausor, B.A. . 470

LII.—Optical Activity of Certain Ethers and Esters. By Professor Philippe A. Guye 475

LIII.—The Influence of Solvents on the Rotation of Optically Active Compounds. Part II. Influence of *iso*Butyl Alcohol and of *sec.*Octyl Alcohol (Methylhexylcarbinol) on Ethyl Tartrate. By T. S. Patterson 477

LIV.—Metal-Ammonia Compounds in Aqueous Solution. Part II. The Absorptive Powers of Dilute Solutions of Salts of the Alkali Metals. By H. M. Dawson and J. McCrae . 493

LV.—Influence of a Heterocyclic Group on Rotatory Power; the Ethyl and Methyl Esters of Dipyromucyltartaric Acid. By Percy F. Frankland and Francis W. Aston, late Forster Research Scholar 511

LVI.—Formation of Amides from Aldehydes. By Robert Howson Pickard, D.Sc., Ph.D., and William Carter . 520

LVII.—Additive Compounds of α- and β-Naphthylamine with Trinitro-derivatives of Benzene. By John J. Sudborough . 522

LVIII.—Acetylation of Arylamines. By John J. Sudborough 533

LIX.—A Form of Tautomerism occurring amongst the Thiocyanates of Electronegative Radicles. By Augustus Edward Dixon, M.D. 541

LX.—Halogen-substituted Thiosinamines. By Augustus Edward Dixon, M.D. 553

LXI.—Researches on Morphine. Part II. By S. B. Schryver and Frederic H. Lees 563

LXII.—The Constitution of Pilocarpine. Part II. By Hooper Albert Dickinson Jowett, D.Sc. 580

LXIII.—Pheno-*a*-ketoheptamethylene and its Derivatives. By Frederic Stanley Kipping, Ph.D., D.Sc., F.R.S., and Albert E. Hunter 602

PAGE

LXIV.—The Chemical Action of *Bacillus coli communis* and Similar Organisms on Carbohydrates and Allied Compounds. By ARTHUR HARDEN 610

LXV.—The Action of Alkyl Haloids on Aldoximes and Ketoximes. Part II. Alkylated Oximes and *iso*Oximes, and the Constitution of Aliphatic Oximes. By WYNDHAM R. DUNSTAN and ERNEST GOULDING 628

LXVI.—The Supposed Existence of Two Isomeric Triethyloxamines. By WYNDHAM R. DUNSTAN and ERNEST GOULDING 641

LXVII.—Studies in the Camphane Series. Part II. Nitrocamphene, Aminocamphene, and Hydroxycamphene. By MARTIN ONSLOW FORSTER 644

LXVIII.—Studies in the Camphane Series. Part III. Action of Hydroxylamine on the Anhydrides of Bromonitrocamphane. By MARTIN ONSLOW FORSTER 653

LXIX.—Contribution to the Chemistry of the Triazoles. 1-Methyl-5-hydroxytriazoles. By GEORGE YOUNG, Ph.D., and WILLIAM HENRY OATES, late 1851 Exhibition Scholar . 659

LXX.—Preparation of *o*-Dimethoxybenzoin and a new method of preparing Salicylaldehyde Methyl Ether. By JAMES C. IRVINE, B.Sc. (1851 Exhibition Research Scholar). (St. Andrews University) 668

LXXI.—Researches on Moorland Waters. Part II. On the Origin of the Combined Chlorine. By WILLIAM ACKROYD, F.I.C. 673

LXXII.—On the Estimation of Cocaine and on Cocaine Hydriodide Periodide. By W. GARSED, Salters' Company's Research Fellow in the Research Laboratory of the Pharmaceutical Society of Great Britain, and J. N. COLLIE, F.R.S. 675

LXXIII.—Note on Acetonylacetone. By THOMAS GRAY . . 681

LXXIV.—Condensation of Acetonylacetone with Hydrazine Hydrate. By THOMAS GRAY 682

LXXV.—Preparation and Properties of 2 : 6-Dibromo-4-nitrosophenol. By MARTIN ONSLOW FORSTER and WILLIAM ROBERTSON, A.R.C.S. 686

LXXVI.—Alkylation of Acylarylamines. By G. DRUCE LANDER 690

LXXVII.—Preparation of Aliphatic Imino-ethers from Amides. By G. DRUCE LANDER 701

LXXVIII.—Preparation of Synthetical Glucosides. II. By HUGH RYAN, M.A., D.Sc., and W. SLOAN MILLS, M.A. . 704

PAGE

LXXIX.—The Influence of Cane-sugar on the Conductivities of Solutions of Potassium Chloride, Hydrogen Chloride, and Potassium Hydroxide, with Evidence of Salt-formation in the last Case. By C. J. MARTIN, M.B., D.Sc., and ORME MASSON, M.A., D.Sc. 707

LXXX.—A Modification of Gutzeit's Test for Arsenic. By EDWIN DOWZARD 715

LXXXI.—Vapour Pressure of Aqueous Ammonia Solution. Part I. By EDGAR PHILIP PERMAN, D.Sc. 718

LXXXII.—Influence of Sodium Sulphate on the Vapour Pressure of Aqueous Ammonia Solution. By EDGAR PHILIP PERMAN, D.Sc. 725

LXXXIII.—The Synthetical Formation of Bridged Rings. Part I. Some Derivatives of Di*cyclo*pentane. By W. H. PERKIN, jun., and J. F. THORPE [and in part, C. WALKER] . 729

LXXXIV.—Lead Silicates in Relation to Pottery Manufacture. By T. E. THORPE, C.B., F.R.S., and CHARLES SIMMONDS, B.Sc. 791

LXXXV.—Derivatives of Methylfurfural. By HENRY J. HORSTMAN FENTON, F.R.S., and MISS MILDRED GOSTLING, B.Sc. 807

LXXXVI.—The symmetrical Chlorodibromo- and Dichlorobromo-anilines and Chloro- and Bromo-amino-derivatives of Chlorobromo-acetanilides. By F. D. CHATTAWAY and K. J. P. ORTON 816

LXXXVII.—The Replacement of Bromine by Chlorine in Anilines. By F. D. CHATTAWAY and K. J. P. ORTON . . 822

LXXXVIII.—Optically Active Nitrogen Compounds and their Bearing on the Valency of Nitrogen. *d*- and *l*-α-Benzylphenylallylmethylammonium Salts. By WILLIAM JACKSON POPE and ALFRED WILLIAM HARVEY 828

LXXXIX.—Hydroxyoxamides. By ROBERT HOWSON PICKARD, D.Sc., Ph.D., and WILLIAM CARTER 841

XC.—Note on Pyromucylhydroxamic Acid. By ROBERT HOWSON PICKARD, D.Sc., Ph.D., and ALLEN NEVILLE, B.Sc. . . 847

XCI.—The Absorption Spectra of Cyanogen Compounds. By WALTER NOEL HARTLEY, F.R.S.; JAMES J. DOBBIE, D.Sc., M.A.; and ALEXANDER LAUDER, B.Sc. 848

XCII.—A New Method for the Determination of Hydrolytic Dissociation. By ROBERT CROSBIE FARMER, B.Sc. (Vict.), Ph.D. (Würzburg), Priestley Scholar in the University of Birmingham 863

Annual General Meeting 871

Obituary Notices 888

PAGE

XCIII.—The Chlorine Derivatives of Pyridine. Part VII. Some Condensation Products. By W. J. Sell, M.A., F.R.S., and F. W. Dootson, M.A., D.Sc. 899

XCIV.—The Action of Lead Thiocyanate on the Chlorocarbonates. Part II. Carboxymethyl- and Carboxyamyl-thiocarbimides and their Derivatives. By Robert Elliott Doran 906

XCV.—A Laboratory Method for the Preparation of Ethylene. By G. S. Newth 915

XCVI.—Condensation of Phenols with Esters of the Acetylene Series. Part V. Homologues of Benzo-γ-pyrone. By Siegfried Ruhemann 918

XCVII.—The colloid form of Piperine, with especial reference to its Refractive and Dispersive Powers. By Henry G. Madan, M.A. 922

XCVIII.—The Condensation of Phenyl Ethyl Ketone and Benzaldehyde. By Robert Duncombe Abell, B.Sc. (Wales), 1851 Exhibition Scholar of the University College of North Wales, Bangor 928

XCIX.—The Decomposition of Chlorates. Part IV. The Supposed Mechanical Facilitation of the Decomposition of Potassium Chlorate. By William H. Sodeau, B.Sc. . . 939

C.—The Nutrition of Yeast. Part III. By Arthur L. Stern, D.Sc. 943

CI.—Oroxylin. By William Arthur Harrison Naylor and Charles Stanley Dyer 954

CII.—Optically Active Dimethoxysuccinic Acid and its Derivatives. By Thomas Purdie, F.R.S., and James C. Irvine, B.Sc. 957

CIII.—The Influence of Solvents on the Rotatory Powers of Ethereal Dimethoxysuccinates and Tartrates. By Thomas Purdie, F.R.S., and William Barbour, B.Sc., Berry Scholar in Science 971

CIV.—The Occurrence of Paraffins in the Leaf of Tobacco. By T. E. Thorpe, C.B., F.R.S., and John Holmes . . . 982

CV.—Studies in the Camphane Series. Part IV. The Isomerism of α-Benzoylcamphor. By Martin Onslow Forster . . 987

CVI.—Studies in the Camphane Series. Part V. Halogen Derivatives of *p*-Cymene from substituted Nitrocamphanes. By Martin Onslow Forster and William Robertson, A.R.C.S. 1003

CVII.—Reduction of αγ-Dibenzoylpropane and Dibenzoyldiphenylbutadiene. By Francis R. Japp, F.R.S., and Arthur C. Michie, B.Sc. 1010

PAGE

CVIII.—Homologues of Anhydracetonebenzil. By Francis R. Japp, F.R.S., and Andrew N. Meldrum, B.Sc. . . . 1024

CIX.—The Direct Union of Carbon and Hydrogen. Part II. By William A. Bone and David S. Jerdan . . . 1042

CX.—On the Decomposition of Carbon Dioxide when submitted to Electric Discharge at Low Pressures. By J. Norman Collie, Ph.D., F.R.S. 1063

CXI.—Metal-Ammonia Compounds in Aqueous Solution. Part III. Salts of the Alkaline Earth Metals. By H. M. Dawson and J. McCrae 1069

CXII.—Metal-Ammonia Compounds in Aqueous Solution. Part IV. The Influence of Temperature on the Dissociation of Copper-Ammonia Sulphate. By H. M. Dawson and J. McCrae 1072

CXIII.—Additional Notes on Dinitro-*o*-anisidine. Chemical Reaction in which one of the Products continues the same Reaction. By Raphael Meldola, F.R.S., and John Vargas Eyre 1076

CXIV.—Some relations between Physical Constants and Constitution in Benzenoid Amines. Part II. By Paul Gordan and Leonhard Limpach 1080

CXV.—The combined action of Diastase and Yeast on Starch-granules. By George Harris Morris, Ph.D., B.Sc. . . 1085

CXVI.—Action of Bromine on the Three Tolueneazophenols. By J. T. Hewitt and John N. Tervet 1090

CXVII.—Nitrilosulphates. By Edward Divers and Tamemasa Haga 1093

CXVIII.—Ammonium and other Imidosulphites. By Edward Divers and Masataka Ogawa 1099

CXIX.—Ethyl *sec.*Octyl Tartrate and its Dibenzoyl and Diacetyl Derivatives. By John McCrae. 1103

CXX.—The Aluminium-Mercury Couple. Part III. Chlorination of Aromatic Hydrocarbons in presence of the Couple. The Constitution of the Dichlorotoluenes. By Julius B. Cohen and Henry D. Dakin, the Yorkshire College . . 1111

CXXI.—The Esterification of 3-Nitrophthalic Acid. By Alex. McKenzie, Grocers' Company Research Scholar . . . 1135

CXXII.—Derivatives of 3-Nitrotolyl-4-hydrazine. By Frank Geo. Pope and Jas. Morton Hird 1141

CXXIII.—The Constituents of the Sandarac Resins. By Thomas Anderson Henry, D.Sc. (Lond.), Salters' Company's Research Fellow in the Laboratories of the Imperial Institute 1144

CXXIV.—Gum Tragacanth. By Cornelius O'Sullivan, F.R.S. 1164

PAGE

CXXV.—Condensation of Phenols with Esters of the Acetylene Series. Part VI. By SIEGFRIED RUHEMANN and ERNEST WRAGG, B.A. 1185

CXXVI.—The Hydrobromides of Undecylenic Acid. By JAMES WALKER and JOHN S. LUMSDEN 1191

CXXVII.—*n*-Decanedicarboxylic Acid. By JAMES WALKER and JOHN S. LUMSDEN 1197

CXXVIII.—The Action of Sodium Methoxide and its Homologues on Benzophenone Chloride and Benzal Chloride. By JOHN EDWIN MACKENZIE, D.Sc., Ph.D. 1204

CXXIX.—Action of the Chlorides of Phosphorus on Aromatic Ethers of Glycerol. Diaryloxy*iso*propylphosphorous Acids. By D. R. BOYD 1221

CXXX.—Autofermentation and Liquefaction of Pressed Yeast. By ARTHUR HARDEN and SYDNEY ROWLAND . . . 1227

CXXXI.—Non-existence of the so-called Suboxide of Phosphorus. Part II. By CHARLES HUTCHENS BURGESS and DAVID LEONARD CHAPMAN 1235

CXXXII.—The Action of Ammonia on Metals at High Temperatures. By GEORGE THOMAS BEILBY and GEORGE GERALD HENDERSON 1245

CXXXIII.—Condensation of Benzil with Dibenzyl Ketone. By GEORGE GERALD HENDERSON and ROBERT HENRY CORSTORPHINE, B.Sc. 1256

CXXXIV.—The Form of Change in Organic Compounds, and the Function of the *a-meta*-Orientating Groups. By ARTHUR LAPWORTH 1265

CXXXV.—The Constitution of Camphanic Acid and of Bromocamphoric Anhydride. By ARTHUR LAPWORTH and WALTER HENRY LENTON 1284

CXXXVI.—The Chlorodibromo- and Dichlorobromo-benzenes. By WILLIAM HOLDSWORTH HURTLEY, D.Sc. (Lond.) . . 1293

CXXXVII.—Experiments on the Production of Optically Active Compounds from Inactive Substances. By J. B. COHEN and C. E. WHITELEY 1305

CXXXVIII.—The Products of the Action of Fused Potassium Hydroxide on Dihydroxystearic Acid. By HENRY RONDEL LE SUEUR 1313

CXXXIX.—Note on the Supposed Formation of an Oxide of Hydrogen higher than the Dioxide. By WILLIAM RAMSAY, F.R.S. 1324

CXL.—The Electrolytic Reduction of Nitrourea. By G. W. F. HOLROYD 1326

CXLI.—The Constitution of Pilocarpine. Part III. By HOOPER ALBERT DICKINSON JOWETT 1331

PAGE

CXLII.—A New Synthesis of α-Ethyltricarballylic Acid. By Hooper Albert Dickinson Jowett 1346

CXLIII.—Benzoylation of Fatty Acids in the Presence of Ammonia. Formation of Amides. By K. J. P. Orton . 1351

CXLIV.—Liquid Nitrogen Peroxide as a Solvent. By Percy Faraday Frankland, Ph.D., F.R.S., and Robert Crosbie Farmer, M.Sc. (Vict.), Ph.D. 1356

CXLV.—The Action of Aluminium Chloride on Camphoric Anhydride. Part II. By W. H. Perkin, jun., and J. Yates. 1373

CXLVI.—Brazilin and Hæmatoxylin. Part I. By A. W. Gilbody, W. H. Perkin, jun., and J. Yates . . . 1396

C. Ramsberg
